

FORMACT

5V5 ASYMMETRIC CYBER WARFARE

1 FIGHTER + 4 SPECIALISTS

REAL-TIME CODE FORGE

PBR ORBITAL ARENA

"Fighters battle in high-velocity arena combat while coding specialists write and deploy custom weapons, shields, and abilities live during match gameplay."

Document Title: Official Game Landing Page — Complete Specification & Technical Blueprint
Publisher: iUXOA Creative Technology | **Target Engine:** Web (React / Next.js / Tailwind CSS / Three.js)
Confidentiality: Commercial Release Material | **Date:** September 2026 | **Revision:** 1.0 Master

1. EXECUTIVE SUMMARY & GAME VISION

1.1 WHAT IS FORMACT?

FORMACT is a groundbreaking commercial competitive multiplayer title developed by **iUXOA Creative Technology**. It combines high-octane 3D third-person arena combat with real-time in-game software engineering.

Unlike conventional hero shooters or battle arenas where player loadouts are pre-baked, FORMACT splits each 5-player squad into two deeply interdependent, asymmetric roles:

⚔ The Fighter (1 Player per Team)

Engages in high-mobility physical combat inside the orbital *Sanctuary Core Arena*. Moves at speeds up to 14 m/s, captures territorial zones, dodges incoming fire, and communicates tactical needs via rapid radial callouts (**F1: Swift Weapon**, **F2: Heavy Piercer**, **F3: Barrier Shield**, **F4: Cryo CC**).

💻 The Specialists (4 Players per Team)

Sit in an advanced in-game Developer Workshop IDE. They receive real-time bi-directional telemetry from their Fighter, write real Java-style code, compile through a 14-point AURA security sandbox, and physically **Forge & Deploy** brand-new weapons, shields, and abilities into the Fighter's hands mid-fight.

1.2 THE SIGNATURE MECHANIC: "THE LIVE FORGE LOOP"

The core loop is the central value proposition that the landing page must instantly communicate within 5 seconds of visitor arrival:

1.3 LANDING PAGE OBJECTIVES & BUSINESS GOALS

OBJECTIVE	DESCRIPTION	TARGET METRIC / KPI
Alpha Playtest Signups	Drive immediate standalone client downloads and newsletter registrations.	Conversion Rate ≥ 14.5%
Immediate Hook Clarity	Visitors must understand the "Fighter + Coding Designers" concept in ≤ 10 seconds.	Bounce Rate ≤ 38%
Steam & Epic Wishlists	Secondary CTA directing players to wishlist the title ahead of Season 1.	Wishlist Click-through ≥ 22%
Interactive Engagement	Allow visitors to test-forge a weapon directly in the browser via an interactive widget.	Widget Interaction Rate ≥ 45%

2. THE 5 OPERATIVE ROLES (DETAILED PROFILES)

The landing page requires an interactive Role Showcase tab/carousel. Below is the complete canonical specification, lore, specialization stats, and sample code for each role:

✂ Role 1: The Fighter (Operative) — Frontline Combat Specialist

Philosophy: "Without tools, I am flesh. With your code, I am sovereign."
Combat Style: Third-person high-mobility action. Armed with kinetic thrusters, 3-hit combo strikes, air dashes, and directional shield parries.
Key Telemetry Monitored: Health (100 HP), Shield Barrier (80 SP), Energy Reserves (100 EP), Capture Zone Proximity.
Landing Page Visual: Armored cybernetic operative standing on the orbital observation deck overlooking Earth with glowing cyan visor.

🔪 Role 2: Weapons Designer — Lethality & Damage Architecture

Philosophy: "Every millisecond between swing and impact is an optimization opportunity."
Specialization: Attack rate, base damage scaling, blade reach, and elemental onHit triggers (Thermal Burn, Cryo Freeze, Energy Shield-Piercing).
Sample Java Code:

```
public class AntiShieldBlade {
    public float damage = 75.0f;
    public float attackRate = 2.0f;
    public float range = 2.8f;
    public String damageType = "Energy";

    public void onHit(TargetContext target) {
        if (target.hasShield()) {
            target.shatterShield();
            target.dealBonusDamage(50.0);
        }
    }
}
```

🌟 Role 3: Ability Designer — Crowd Control & Tactical Movement

Philosophy: "Control space, control time, control victory."
Specialization: Quantum blinks, gravitational pull vortexes, EMP shockwaves, and stun bursts.
Sample Java Code:

```
public class QuantumPulse {
    public float cooldown = 6.0f;
    public float radius = 8.5f;

    public void onActivate(TargetContext target) {
        target.applyDisrupt(3.0);
    }
}
```

```
        target.applySlow(2.5, 0.45);
    }
}
```

🛡️ **Role 4: Defense Designer** — *Barrier Physics & Fortification*

Philosophy: "An unbreakable shield turns the enemy's own kinetic force against them."

Specialization: Hexagonal energy barriers, reactive armor, emergency deflector shields, and health regeneration.

Sample Java Code:

```
public class AegisForcefield {
    public float shieldCapacity = 120.0f;
    public float rechargeRate = 18.0f;

    public void onEquip(FighterContext fighter) {
        fighter.addBonusShield(75.0);
        fighter.heal(25.0);
    }
}
```

⚙️ **Role 5: Systems Architect** — *Team Energy Grid & Synergy Optimization*

Philosophy: "Chaos consumes power. Harmony conquers worlds."

Specialization: Global squad power balancing, Forge cooldown reduction, power node routing, and team energy reserve amplification.

3. LANDING PAGE STRUCTURE & SECTION-BY-SECTION BLUEPRINT

3.1 MASTER PAGE ARCHITECTURE

The landing page is designed as a single-page immersive web application with smooth anchor scrolling and interactive modals:

TOP NAVIGATION BAR [Fixed / Glassmorphic Blur]

[Logo: F O R M A C T] | Overview | The 5 Roles | Live Forge Demo | Arena & Tech | System Specs | FAQ | **PLAY**
ALPHA NOW →

SECTION 1: CINEMATIC HERO [100vh Full Viewport]

- **Main Title:** F O R M A C T (Wide sci-fi kerning with glowing cyan caret)
- **Sub-Headline:** 5v5 Asymmetric Cyber Warfare — 1 Fighter, 4 Specialists.
- **Value Statement:** "Code the weapons in real time. Win the fight in the arena."
- **Dual Action Buttons:**
 - [⚡ DOWNLOAD ALPHA PLAYTEST (PC / 215 MB)] (Primary Cyan Glow Button)
 - [▶ WATCH GAMEPLAY TRAILER (01:45)] (Secondary Ghost Outline Button)
- **Background:** Three.js interactive 3D particle starfield + slow-rotating Earth horizon with floating holographic rings.

SECTION 2: THE ASYMMETRIC DUALITY [Interactive Split Screen]

- **Left Column: The Arena Fighter** — 120 FPS action, dodging, strikes, real-time tactical request buttons (F1-F4).
- **Center Connector: High-Speed Cyber Data Stream** — Bi-directional telemetry flowing live at 20 Hz.
- **Right Column: The Developer Workshop** — Monospace IDE, 14 AURA security gates, live 3D holographic weapon turntable preview.

SECTION 3: THE 5 OPERATIVE ROLES [Interactive Tabbed Carousel]

Tabs for: [⌘ Fighter] [🔫 Weapons] [⚡ Ability] [🛡 Defense] [⚙ Systems Architect]
Displays animated character cards, specialty meters (Damage, Range, Cooldown, Utility), and interactive code snippet viewer.

SECTION 4: "FORGE IN THE BROWSER" [Interactive Live Coding Widget]

- Editable code window allowing visitors to change numeric values (`damage = 85` , `range = 3.2`).
- Live procedural 3D weapon rendering (Canvas/WebGL) that dynamically scales and shifts color from Cyan to Orange/Frost/Green.
- Clicking [⚡ **FORGE & DEPLOY**] triggers compilation sound effects, confetti particles, and displays: "DEPLOYED TO TEAM FIGHTER!".

SECTION 5: THE SANCTUARY CORE ARENA [Visual Showcase]

Full-bleed photo showcase of the low-orbit platform, deep elongated sun shadows, monolith pillars with cyan LED strips, and the curving Earth atmosphere below.

SECTION 6: SYSTEM SPECS, DOWNLOAD CTA & COMMUNITY

- Comparison Table: Minimum vs Recommended vs "Potato-PC" Mode (runs smooth on integrated Intel UHD 620).
- Direct download links for Standalone ZIP package ([FORMACT_Playtest_Setup_v1.0.zip](#)).
- Discord, Steam Wishlist, Reddit, and GitHub community channels.

4. DESIGN SYSTEM & FRONTEND TECHNICAL SPECS

4.1 COLOR PALETTE (CSS VARIABLES)

TOKEN NAME	HEX VALUE	PREVIEW	SEMANTIC USAGE
<code>--color-electric-cyan</code>	<code>#00E5FF</code>	Primary Brand Accent	Hero titles, primary buttons, Energy weapons, active glows
<code>--color-alpha-blue</code>	<code>#0070BA</code>	Team Alpha Identity	Team Alpha player cards, UI borders, status pills
<code>--color-omega-crimson</code>	<code>#E91E63</code>	Team Omega Identity	Team Omega opponent cards, alerts, critical warnings
<code>--color-thermal-orange</code>	<code>#FF7043</code>	Thermal / Fire	Thermal weapons, energy cost indicators, warning badges
<code>--color-cryo-blue</code>	<code>#5CD9FF</code>	Cryo / Frost	Cryo weapons, slow debuffs, shield barriers
<code>--color-corrosive-green</code>	<code>#33F266</code>	Success / Verified	AURA security pass, compile success, health restoration
<code>--color-bg-void</code>	<code>#060A14</code>	Deep Void Navy	Primary page background, modal overlays
<code>--color-bg-card</code>	<code>#0C1424</code>	Surface Card Navy	Feature cards, IDE container background, tab containers

4.2 TYPOGRAPHY HIERARCHY

- **Primary Display Font:** `'Orbitron', 'Rajdhani', sans-serif` (Google Fonts) — Used for Brand Logo, Hero Title, Section Headers, and Score Overlays.
- **Body & Interface Font:** `'Inter', 'Segoe UI', sans-serif` — Used for body copy, paragraphs, table contents, and navigation links.
- **Code & Terminal Font:** `'JetBrains Mono', 'Fira Code', monospace` — Used for in-browser IDE widget, Java code blocks, compiler logs, and telemetry values.

4.3 SYSTEM REQUIREMENTS TABLE (READY TO PASTE)

SPECIFICATION	POTATO-PC (LOW-END TARGET)	RECOMMENDED (COMPETITIVE 120 FPS)
Operating System	Windows 10 / 11 (64-bit)	Windows 10 / 11 (64-bit)
Processor (CPU)	Intel Core i3-6100 / AMD Ryzen 3 1200	Intel Core i5-11400 / AMD Ryzen 5 3600
Memory (RAM)	4 GB RAM (Optimized < 350 MB game footprint)	8 GB RAM or higher
Graphics (GPU)	Intel HD 520 / UHD 620 (Integrated)	NVIDIA GTX 1060 (6GB) / AMD RX 580

SPECIFICATION	POTATO-PC (LOW-END TARGET)	RECOMMENDED (COMPETITIVE 120 FPS)
DirectX	Version 11	Version 12
Network	Broadband Internet (Offline Practice available)	Low-latency Ethernet connection
Storage	500 MB available disk space	1 GB available disk space (SSD)

5. READY-TO-USE COPYWRITING & MARKETING CONTENT

5.1 HERO SECTION COPY

- **Pre-Header:** CYBER ARENA // ALPHA PLAYTEST V1.0 NOW LIVE
- **Headline:** YOU DON'T JUST PLAY THE META. YOU WRITE IT.
- **Subhead:** 5v5 Asymmetric Competitive Combat. 1 Fighter battles on the edge of space while 4 Specialists engineer custom weapons in real-time.
- **Primary CTA Button:** [⚡ DOWNLOAD ALPHA (PC)]
- **Secondary CTA Button:** [▶ WATCH TRAILER]

5.2 "HOW IT WORKS" 3-STEP WALKTHROUGH COPY

01 / THE REQUEST

Your team's Fighter encounters an enemy shielded by an impenetrable barrier. With a single tactical tap (F1), they request an anti-shield counter-measure.

02 / THE CODE

In the IDE, the Weapons Designer writes a custom Java class: `target.shatterShield();`
`target.dealBonusDamage(50.0);`.
The AURA AI checks all 14 security gates in 8ms.

03 / THE FORGE

With a click of *Forge & Deploy*, team energy is deducted, and the blade materializes in the Fighter's hands mid-strike to turn the tide of battle.

5.3 FREQUENTLY ASKED QUESTIONS (FAQ SECTION)

Q: Do I need to be a professional programmer to play as a Specialist?

A: Absolutely not! FORMACT features an intuitive *Auto-Fill Archetype Engine* with pre-built templates for every combat situation. Beginners can simply tweak numbers (e.g. changing `damage = 60` to `damage = 85`), while experienced coders can write advanced procedural combat logic, conditional combos, and status hooks.

Q: How does the game prevent infinite loops, exploits, and game-breaking cheats?

A: Every line of code submitted passes through the proprietary **AURA Security Sandbox**. It enforces a strict 1,000-instruction execution budget (guaranteeing 0 CPU hangs), bans reflection, filesystem I/O, and unauthorized networking, and checks server-authoritative damage ceilings to maintain absolute competitive balance.

Q: Can I play alone without an internet connection?

A: Yes! FORMACT features a complete, standalone **Practice vs AI** mode that runs 100% offline. Autonomous AI bots fill all remaining 9 player slots (both Fighters and Specialists), allowing you to train or experiment with code anywhere.

Q: Is FORMACT pay-to-win?

A: Never. All 4 specialization modules, all weapons, and all code capabilities are 100% free and unlocked for all players from day one. Victory is decided purely by combat skill, software engineering ingenuity, and squad communication.

READY TO FORGE THE FUTURE OF COMPETITIVE ESPORTS?
